

Flossbach von Storch - Der erste Schritt - R²

INVESTMENT STRATEGY

The Flossbach von Storch – Der erste Schritt fund is a globally diversified, defensive balanced fund with an active investment approach. The fund is flexible enough to take advantage of opportunities arising from the entire bond market and, to a limited extent, from the equity market. The goal is to generate as stable earnings as possible over time. The focus of the fund is on government bonds, covered bonds and corporate bonds, as well as equities, whose quota is limited to a maximum of 15 per cent. Foreign currency risks are largely hedged. Securities are selected as part of a fundamental analysis process. Fund managers Wilhelm Wildschütz and Elmar Peters rely on research tools developed in-house. The sub-fund is actively managed. The fund manager determines, regularly reviews and, if necessary, adjusts the composition of the portfolio exclusively in accordance with the criteria specified in the investment policy. The sub-fund is not managed in reference to an index.

EXPLANATORY NOTES REGARDING PERFORMANCE

Gross fund performance (BVI method) takes into account all costs incurred at fund level (for example, management fees), net fund performance also takes into account the subscription fee. Further costs may be charged individually at customer level (e.g. custody fees, commissions and other charges). Example calculation (net method): An investor wishes to buy shares with capital of €1,000. Based on a maximum subscription fee of 5 %, € 50 will be deducted from their investment as a one-off initial charge. In addition, custody fees may also be applied, which will further reduce the investor's return. The level of custody fees can be found in your bank's schedule of fees and services.

Please refer to the cost details presented in this document to determine the maximum subscription fee for the share class of the sub-fund.

The reference index is merely informative. It does not constitute any obligation from the fund manager to track the index or achieve the same performance.

Past performance is not a reliable indicator of future performance.

MONTHLY COMMENTARY

The performance of the Fund changed little in the past month. In the equity and bond markets, a sideways movement predominated on balance, although European bonds reacted to the pronounced inflation debate with slight rising yields over the course of the month. US bonds, on the other hand, stabilised after a weak first quarter. As a result, we made few changes to our portfolio orientation. We used part of the cash position to take advantage of the higher yield levels for purchases of five-year and 30-year German Bunds and to a lesser extent 20-year Australian government bonds. Conversely, we also increased the share of corporate bonds with bond purchases by Deutsche Bahn and by participating in the new issue of the transmission grid operator Tennet. All in all, the ratio of government and corporate bonds in the portfolio remained roughly the same. Only our cash balance declined slightly to eight per cent over the course of the month as a result of these purchases.

- » Investment Adviser and Bank Trainee at Bankhaus Delbrück & Co. in Aachen/Cologne (1988–1993)

Flossbach von Storch - Der erste Schritt - R

OPPORTUNITIES

- + Participate in global bond market growth.
- + Income can be generated from regular interest payments.
- + Active interest rate, currency and risk management (e.g. from the use of derivatives).
- + Risk is broadly diversified by investing in a range of asset classes (e.g. equities, bonds, convertible bonds etc.) Market potential can be exploited by investing across a wide range.

RISKS

- The securities in which the Management Company invests the sub-fund assets present opportunities for gain but also the possibility of risk. If a sub-fund invests directly or indirectly in securities and other assets, it is subject to many general trends and tendencies, which are sometimes attributable to irrational factors on the markets particularly on the securities markets. Losses can occur when the market value of the assets decreases as against the cost price. If a unitholder sells units of the sub-fund at a time at which the value of assets in the sub-fund has decreased compared with the time of the unit purchase, he will not receive the full amount he has invested in the sub-fund. Despite the fact that each sub-fund aspires constant growth, this cannot be guaranteed.
- Country, credit and issuer liquidity risk. Also potential exchange rate risks. If securities are illiquid (i.e. thinly traded), there is a risk that it may either not be possible to sell the assets at all or only by accepting a significant discount on the sale price.
- Investing in bonds may entail price risks, especially in case of rising interest rates on the capital markets.
- Where used, derivatives can have a greater negative impact on the fund value than would be the case if the assets were acquired directly. This can affect the fund's risk profile and volatility (tendency for the price to fluctuate).

Please read the Prospectus and particularly the RISK WARNINGS section and the specific annex of the subfund to understand the risks and benefits of this product.

GLOSSARY

Yield to maturity (YTM)

Yield on a bond held until maturity, taking into account interest payments and any differences between the issue price and the redemption amount.

Duration

Indicates how long capital invested is bound in a bond. It is shorter than the maturity of a bond since regular interests paid out to investors, are considered. For Zero-Bonds, duration and maturity is the same. Interests are due at maturity date.

Average dividend yield

Ratio of dividend to share price. It is shown as a per cent and provides information about how a share bears interest.

INVESTOR PROFILE

CONSERVATIVE:

The fund is appropriate for conservative investors. Due to the composition of the net sub-fund assets, there is a moderate degree of risk but also a moderate degree of profit potential. The risks may consist in particular of currency risk, credit risk and price risk, as well as market interest rate risks.

INVESTMENT HORIZON:

Medium-term: 3 to 5 years

RISK/RETURN PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The historical data used for calculating the synthetic indicator is not a reliable indication of the future risk and reward profile of the share class. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment. This share class has been placed in the aforementioned risk class because its unit price is subject to little to medium fluctuation, therefore the profit potential and loss exposure may be low to moderate. Because of the calculation model used, all risks may not be taken into consideration when placing the share class in a risk class. Detailed information can be found in the section entitled "Risks" of the prospectus.
